

<b>Dimensions</b>	<p>LOA: 8.99m          Beam: 2.49m          Draft: 0.40m</p>
<b>Propulsion</b>	<p>1 x UQM Powerphase Pro 220 Electric Motor          150kW (200bhp) continuous power &amp; 220kW (290bhp) peak power, water glycol cooled          1 x Alamarin AJ245 Water Jet</p>
<b>Energy Storage</b>	<p>Option of 2 - 3 Kreisel 58.75kWh liquid cooled lithium ion battery packs          Linked up using Vita "Powersafe" plug and play Power Distribution Unit</p>
<b>Cockpit</b>	<p>'Fly-by-wire' user interface and touchscreen navigational display          Bespoke steering wheel with tactile feedback          Electronic throttle levers offering seamless acceleration control          Minimalist, uncluttered helm station          Bespoke infotainment system with seven-speaker surround sound</p>
<b>Seating</b>	<p>Up to 8 adults          Flexible configuration allowing ease of use in all circumstances:</p> <p><b>High speed mode</b>          Fore and aft seats face forward for maximum safety and stability          Luxurious leather cushioning allows high speed transit in total comfort</p> <p><b>Lounge mode</b>          Seats flip down to create additional bench area          2 - 3 x keel-cooled fridges under aft bench provide generous food and drink storage          Luxurious cushioned sunbed</p> <p><b>Dining mode</b>          Table rises from cockpit floor for hassle-free dining          Front seatbacks flip down to create additional bench area          Under seat drawers provide generous food and drink storage</p>

**Bathing**

Handcrafted non-slip teak bathing platform  
Fold-out swim ladder with integrated handles  
Fresh water shower fitted at stern -  
Minimised risk of injury thanks to propeller-free  
waterjet propulsion system  
Underwater lighting at the transom allowing  
for night-time swimming

---

**Storage**

2m<sup>2</sup> of storage space in forepeak for  
equipment and personal effects  
Cockpit optimised for entertainment and relaxation, including  
phone/tablet pocket with 4 dedicated charging points.  
Underseat drawers doubling as added cool storage if required  
Additional 180 litres of non-perishable storage in bilge area

---

**Forepeak configuration**

Forepeak is accessed through a hinged door.  
Ample storage space, including for fenders.  
Access to system control panel.

---

**Hull & deck**

Hull developed to optimise weight and strength using  
the latest carbon-composite materials.  
Follows classic speedboat lines including a deep forefoot for  
excellent ride quality, and angled chines to provide the right  
balance between straight line performance and cornering agility.  
Teak decking provides a beautiful and effective non-slip surface.

---

**Windscreen & hatches**

All-glass toughened windscreen, custom molded by Italian  
specialists, protects the crew and passengers from salt  
and spray. Its elegant stainless-steel frame is designed to  
double as a hand hold.  
Forward, the anchor hatch leads to the self-draining anchor well.  
Aft, a split hatch system provides smaller opening for access to  
storage and full opening on gas springs for access to all power  
and propulsion system components.

---

**Engine room**

Carefully managed to optimise system installation, accessed  
through a lifting hatch containing solar panels that provide all the  
energy required to keep critical systems alive.

---

**Safety equipment**

Designed and certified to RCD Category B, the boat includes  
all required safety features for safe and reliable use.
